Low/Non-Phosphate Product Descriptions & Pricing

Michigan State Industries' commercial quality cleaning products are professionally formulated, produced and packaged at Scott Correctional Facility in Plymouth, Michigan. Several MDOC facilities, across the State, have to carefully manage their use of phosphates and control the level of phosphates in their effluent. These facilities are subject to the limits of their DEQ permit or subject to phosphate surcharges. The MSI products in this list are either low or non-phosphate products and are recommended for use in these facilities.

AIR & LAUNDRY FRESHENER

Laundry Fresh

This product is formulated with a specific combination of "fresh" scents. It is designed to add a pleasant fragrance to freshly laundered dry clothing. It can also be used to freshen laundry storage areas, dress-out areas, locker rooms or bathrooms. Very effective against all difficult odors. One trigger sprayer included with each case of quarts. Additional sprayers available, MSI product number 8753.
